

GROK ACCOUNT ROUTER SANDBOX RULES

Boundary: edit ONLY inside dev_sandbox_grok_account_router.

Do NOT modify production files or other folders.

Task: design/prototype multi-account Grok routing.

If account-wide limit occurs, switch to another available account.

Canvas-local limit is different and should be handled by new canvas recovery.

Security requirements:

Encrypt all account secrets at rest.

Never store passwords/cookies/tokens in plaintext.

Never write secrets to logs or project files.

Mask account identifiers in UI and logs.

Prefer OS keychain, DPAPI, safeStorage, or approved credential vault.

Deliverables: design, schema, security model, implementation plan, optional prototype/tests.
